### Proven Record of Success Serving the Utility Industry

For the last 13 years, program delivery to our utility and energy vertical has grown rapidly and earned client accolades and awards. Our utility industry supply chain specialists understand the importance of meeting regulatory and stakeholder requirements by tracking compliance and providing detailed reports using mutually agreed upon KPIs to measure success. Our teams meticulously identify and mitigate risk factors to deliver the highest Six Sigma level of operational and quality performance.

### Advanced Technology for Efficiency and Data Security

Here's the secret to our ability to simplify complex programs: Award-winning ALOM technology systems allow us to design, customize and collectively manage the physical, digital, and financial supply chains. We offer customized and branded order management portals, high-speed variable print and detailed back-end reporting. Our customized analytics dashboards allow everyone to follow activities.

When it comes to accuracy, transparency and security, we leave nothing to chance. We are SOC2 certified demonstrating our commitment to our clients and their end-users to provide the highest levels of data security, redundancy and privacy protection.

Our buyers meticulously research and source products that meet the most stringent energy-efficiency standards in the world.
